III. SUPERVISED AGRICULTURAL EXPERIENCE

Without a well supervised agricultural experience program for agriculture students, instruction becomes academic rather than vocational. The instructors of agriculture are responsible for making agricultural experience a valuable and realistic experience to enhance classroom and laboratory instruction. Without close supervision and adequate on-site visitations by the instructor, the students are being denied a very important phase of their total instructional program. The desired number of visits per instructor is 180. In 2022-23 the average number of SAE visits per department was 211
